Legal Description

Lot 54, Sunset Summits Subdivision, Deed Book 116Q, Page 380

Subject Property *(continued)*

Subject Property Commentary

The subject is located in a stable neighborhood of single family homes that vary greatly with regards to style, quality of construction, age, condition, GLA, and site size. The subject property is not located within a distressed or declining market based on the Multiple Listing Data analyzed for this report. Recent trends indicate a stable neighborhood with no factors which would support a change as of the effective date of report. The predominant land use in the subject's neighborhood is one-unit residences as indicated in the present land use section of report. The area contains a portion of vacant land as well. The growth and development of the commercial sector in the Upstate of South Carolina has provided a demand for residential single family homes with several of the larger employers located within 30 miles of this neighborhood.

There has been no damage to the subject property due to the severe storms and no flood or wind related damage was found during the inspection of subject property. The subject property and its neighborhood roads were full accessible as of the effective date of this report. Subject Property is free from damage from the recent FEMA declared disaster.

The Appraiser physically measured the subject property according to ANSI Z765-2021 Standard. Sketch dimensions reported are to the exact exterior dimensions rounded to the nearest 10th of a foot. Dimensions are not rounded to the nearest whole or half foot. Square footage is reported to the nearest whole number.

Description of Property Access Normal ingress/egress from street

Site Influence

Influence	Proximity	Detail	Impact	Comment
Residential	Onsite		Neutral	Typical residential

Site Influence Commentary No apparent adverse site or environmental conditions, easements or encroachments were noted upon visual inspection of the property or believed to be present on the subject property.

View and Impact to Value/Marketability

View	Range of View	Impact
Residential	Full	Neutral

View Commentary The appraiser found no private deed restrictions affecting the property which would limit the use of the subject property in any way. No encroachments or violations of any zoning or other regulations affecting the subject property and the utilization of the land and improvements are within the boundaries or property lines of the property described.

Site Features and Impact to Value/Marketability

Feature	Detail	Impact	Comment
Hazard Zone	No Hazard Zone Noted		InterFlood map included in this report.

Site Features Commentary The subject property is not adversely affected by the potential of floods. The subject property does not have zoning restrictions as of the effective date of report. The subject property can be rebuilt if destroyed. The lack of zoning restrictions does not have a negative impact of the subject's marketability. Neighboring properties do not have zoning restrictions which is typical for this market area.

Utilities and Impact to Value/Marketability

Broadband Internet Available Yes

Dwelling Exterior Commentary

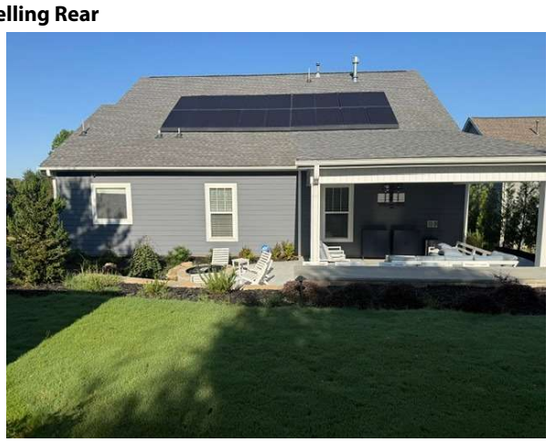

The overall exterior condition is typical for the neighborhood with no adverse conditions noted which would affect the marketability of the subject property. The appraiser of this report has used the following Square Footage-Method for Calculating: ANSI Z765-2021 (American National Standards Institute) Measuring Standard for measuring, calculating, and reporting finished area and non-finished areas of subject property. The appraiser for this report has used the ANSI-Z765 standard for describing, measuring, calculating and reporting of the finished and non-finished areas for the subject property.

Unit Interior Commentary

The interior condition is typical for the neighborhood with no adverse conditions noted which would affect the marketability of the subject property. The normal inspection did not reveal any problems associated with the interior condition of the subject property. The kitchen is fully functional including the sink, stove and cabinetry. The utilities were on and in working order at the time of the inspection. The appraiser found no interior deficiencies that would impact the safety, security or soundness/structural integrity of the subject property.

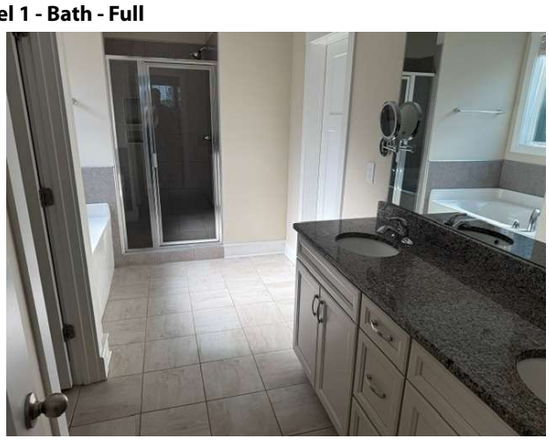

The appraiser did observe the smoke and C/O detectors properly installed in the subject property at time of inspection.

Overall Quality and Condition

Overall Quality	Q4	Overall Condition	C3
Exterior Quality	Q4	Exterior Condition	C3
Interior Quality	Q4	Interior Condition	C3

Reconciliation of Overall Quality and Condition

The subject is in average condition with no repairs needed at time of inspection. The subject suffers no functional or external obsolescence. The overall condition is typical for the neighborhood with no adverse conditions noted which would affect the marketability of the subject property. The kitchen is fully functional including the sink, stove and cabinetry. The utilities were on and in working order at the time of the inspection. The subject generally conforms to the neighborhood in functional utility, style, use and construction.

The appraiser completing this appraisal is not a structural or mechanical engineer or a licensed home inspector and has completed walk-through of the property viewing only the "readily visible" and accessible areas of the property in a superficial and cursory manner, with the assumption that there are no structural defects and that all elements of the home are in a working condition and functioning in their intended use.

There has been no damage to the subject property due to the severe storms and no flood or wind related damage was found during the inspection of subject property. The subject property and its neighborhood roads were full accessible as of the effective date of this report. Subject Property is free from damage from the recent FEMA declared disaster.

The appraiser found no deficiencies that would impact the safety, security or soundness/structural integrity of the subject property.

Highest and Best Use

Is the present use of the subject property ...

Legally Permissible	Yes	**Financially Feasible**	Yes
Physically Possible	Yes	**Maximally Productive**	Yes

	Yes	No
Is the highest and best use of the subject property as improved (or as proposed per plans and specifications) the present use?	☑	☐

Highest and Best Use Commentary

The purpose of the highest and best use analysis is to identify the most profitable, competitive use to which the property can be put based on market forces. The highest and best use analysis is a systematic examination of the subject property and its position in the competitive real estate market.

The four criteria of the highest and best use that the subject property must meet include: 1) physical possibility, 2) legal permissibility, 3) financial feasibility, and 4) maximum productivity. The highest and best use of the subject property is residential single family as of the effective date of this report. The appraiser found no other alternative uses which would meet the criteria for highest and best use.

Market

Market Area Boundary North by Howell Road, East by Nazareth Church Rd, South by Reidville Road and West by Highway 290.

Search Criteria Description The GMLS comparable search for the subject property included detached single family homes located within 4 miles from the subject property which were similar in quality of construction and overall condition. The GMLS search included single family homes with an age of new construction to 20 years and the GLA from 2,400sf to 3,999sf. The GMLS search resulted in 14 sold properties ranging from $430,000 to a high of $630,000.

Search Result Metrics

Active Listings	12	**Sales in Past 12 Months**	14
Median Days on Market	28	Lowest Sale Price	$430,000
Lowest List Price	$432,450	Median Sale Price	$487,000
Median List Price	$459,000	Highest Sale Price	$630,000
Highest List Price	$565,000	**Distressed Market Competition**	No
Pending Sales	2	**Graph**	Absorption Rate
		Price Trend Source	GMLS

Price Trend Analysis Commentary The price trend is supported as stable over the past twelve months based on the MLS data analyzed for this report. In the subject's and competing market areas, some concessions are paid on behalf of the buyer but this was not found to occur in the majority of recent sales. When financial incentives are offered, the trend tends to be that the sellers offer to pay 2-4% of the buyer's closing costs or repair costs. The available market data for properties which compete with the subject property support an overall trend as stable for this assignment. The variance in sold/listing prices were related to the physical characteristics of properties and not the changes in market conditions. The appraiser did not find and over supply of inventory of homes similar to subject property.

Housing Trends

Demand/Supply	In Balance	**Marketing Time**	Under 3 months

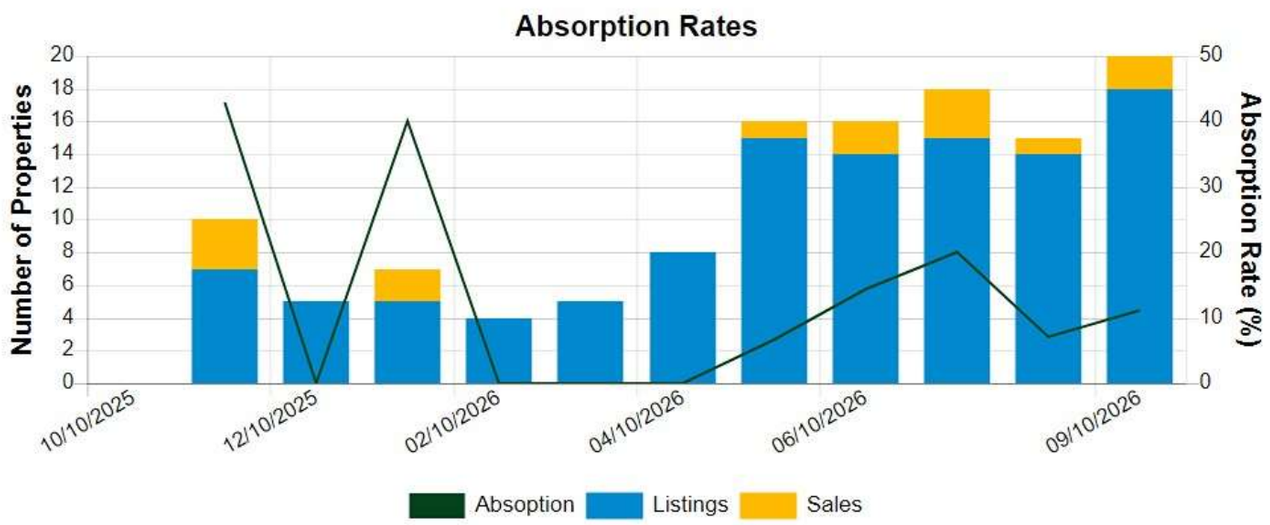

Market Commentary

The subject property is located within an active market with a high demand for homes within this price range. The subject's neighborhood as a whole was found to be stable with no current declining sales other than the REO / Foreclosure / Short Sale / Distressed, etc. sales noted in the neighborhood. The data analyzed and provided for the market research analysis represents all comparable sales considered for the appraisal. This may include the entire market area as well as competing market areas and not just the subject's neighborhood or immediate market area.

REMARKS

Remarks Welcome to 624 Munchberry Way, where exceptional indoor comfort meets unforgettable outdoor living. From the moment you arrive, the gracious front porch extends a warm "welcome home" to all who enter. The thoughtfully designed main level features three bedrooms and three full bathrooms, offering convenience and flexibility for everyday living and guests. The remarkably spacious primary suite is a peaceful retreat with direct access to the covered porch, an expansive walk-in closet, and an oversized, spa-inspired bathroom. At the heart of the home, the gourmet kitchen impresses with double ovens, a gas cooktop, an expansive island, and a double sink—perfect for preparing meals, entertaining, and gathering with those you love. Upstairs provides even more versatile living space with an additional bedroom and full bathroom, a private office, and a spacious game room or loft. The outdoor spaces are truly the showstopper. Relax on the large screened porch or entertain year -round beneath the expansive covered patio with built-in heaters. The chef's dream outdoor kitchen is equipped with grills and a smoker, while the nearby firepit with roasting spit creates the perfect setting for memorable evenings under the stars. Beautiful landscaping surrounds the property, providing a peaceful sense of privacy and a stunning backdrop for outdoor living. Even the storage shed has been thoughtfully designed to complement the home's architecture. From quiet mornings on the porch to lively gatherings with family and friends, this remarkable property was created for living beautifully—inside and out.

Reconciliation of Sales Comparison Approach

In the Sales Comparison Approach, the method of estimating market value was to compare the subject property with comparable properties that have recently sold. The premise of the Sales Comparison Approach is that the market will determine a price for the subject property in the same manner that it determines the prices of comparable competitive properties. This approach in the appraisal analysis is based upon the proposition that an informed purchaser would pay no more for the property than the cost of acquiring an existing or substitute property with the same utility. It is the process of analyzing sales of similar properties, which have recently sold to arrive at an indication of the most probable sales price for the subject property. The Sales Comparison Approach is used in an effort to compare how buyers and sellers are behaving within the subject market area. After selection of the sales, a comparative analysis of relevant factors that influence value was undertaken to adjust the sales to the subject property based upon the actions and preferences demonstrated by participants in the marketplace.

The seller paid concessions did not impact the sale price for comparable sales 1, 2 and 4 within this report. No market adjustment for seller paid concessions was found supported.

No market data was found to support an adjustment for time on sales over six months, but less than twelve.

The comparable sales did not support an adjustment for location between (Spartanburg) and the properties which sold in (Duncan & Moore). No market adjustment for location was found supported.

Sales Comparison Approach *(continued)*

The lack of recent sales made it necessary to expand the search 4 miles in distance to similar and competing market areas due to the limited number of comparable sales in the subject's immediate area. The sales selected were considered competitive and the most reflective of the subject property and considered comparable as they are located in areas that are affected by the same market influences, etc. as the subject.

The lots within the subject's neighborhood typically sell on a per lot basis and would only allow a single family home when less than 35,000 square feet. The comparable sales analyzed in this report which vary in site area by 25% have an overall site value equal to the subject property.

None of the comparable sales provided required a market adjustment for age.

The number of bedrooms did not warrant an adjustment for above grade rooms between a (3) bedroom, (4) bedroom or a (5) bedroom home. The paired sale data did support an market adjustment for bathrooms at $5,000 for a full bathroom and $2,500 for a half bathroom.

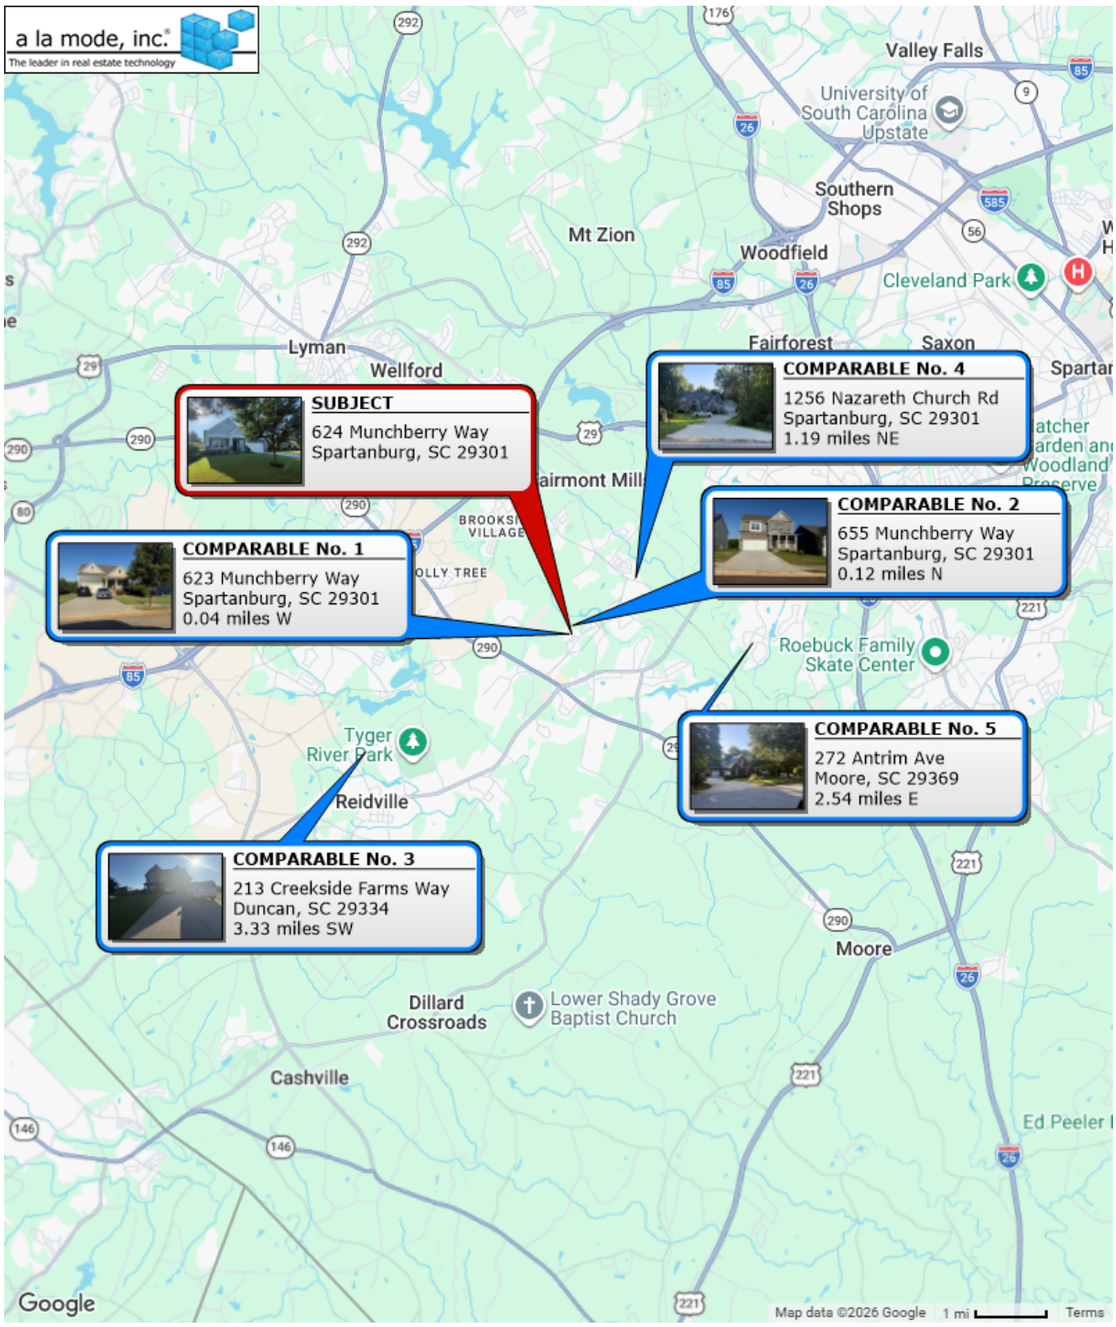

The adjustment for finished above grade square footage was taken from paired sales and represents the reaction of market participants. The market adjustment for finished above grade square footage was best supported at $65 per square foot.

The adjustment for car storage was taken from paired sales and represents the reaction of market participants. The garage adjustment was supported at $7,500 for a single garage and $15,000 for a two car garage.

The comparable sales give an indicated value range from a low of $511,260 to a high of $655,030. The comparable sales provided a wide range of adjusted values for the subject property. Comparable sales 1 and 2 are located within the subject's subdivision with adjusted values at $523,410 and $511,260. Comparable sales 1 and 2 were considered most like the subject property due to the location. Comparable sales 3, 4 and 5 were located in similar competing developments with adjusted values at $559,750, $595,980 and $655,030. The final value for the subject property was based on a weighted sales analysis. The comparable sales 1 and 2 are located within the subject's subdivision and were given more weight in the final value estimate for the subject property. The final value for the subject property is best supported at $564,000 as of the effective date of report.

Reconciliation of Site Value The process of estimating land value is an appraisal technique in which the present estimate of appraised land's value is predicted upon prices paid in actual real estate transactions. Adjustments are made to compensate for the differences between the subject site and each comparable site. It is a process of correlation and analysis of data about similar sites that have recently sold.It is my opinion that the utility value between the comparable sales analyzed and the subject site are sufficiently similar and good comparability exists for analysis purposes. The foregoing sales represent activity for this type of property and are the result of a comprehensive survey of similar utilized properties in the subject area. Each comparable sale was analyzed in relation to the subject property with regards to differences in location, land area, street frontage, access, exposure, development utility, zoning, easements, available public utilities, site conditions, and other physical characteristics, which in my opinion influence value. The individual adjustments to the vacant land sales are not provided within this report but retained with the appraiser's office file.

Cost Approach Commentary

Marshall and Swift Residential Cost Handbook and local builder estimates have been utilized as well as recent new construction sales in arriving at the cost data used in this report. Recent land sales were available and support the site value. Depreciation used in report was by the age/life method. See attached sketch for building measurements.

In the Cost Approach, an indication of the value of the property is derived by adding the depreciation cost of the improvements to the value of the site as if vacant and available for its highest and best use. The method of estimating value through this approach has been to obtain replacement cost information for the subject improvements. Replacement cost has been utilized rather than reproduction cost since the identical material may not be available or current construction design and techniques may differ from the original. It is unlikely that all of the same materials and construction techniques would be used today to construct a building that would provide the same utility. Accordingly, the replacement cost method provides a practical alternative. The non-essential or obsolete features would be omitted and some of the obsolescence present in the building, related to excessive cost items, if any, would be reduced before calculation of accrued depreciation.

The replacement cost estimates are from the Marshall & Swift Valuation Service, a national cost service, and local builder estimates of new construction homes. Builder estimates have been reviewed from recently completed appraisal assignments of new construction and proposed construction homes. The reconciliation is based on the most reliable cost estimate being given most weight. To the replacement cost new estimate, an amount for entrepreneurial profit has been added. Entrepreneurial profit should be a market derived in addition to cost. The costs derived from Marshall and Swift Valuation Service includes the costs of the contractor, but not entrepreneurial profit and overhead. A total cost of this item is included as a percentage of the project. Since the accrued depreciation may have been deducted, the percent is applied to the replacement cost new of improvements. Generally, the percentage utilized is based upon discussions with developers who are knowledgeable in this type of construction.

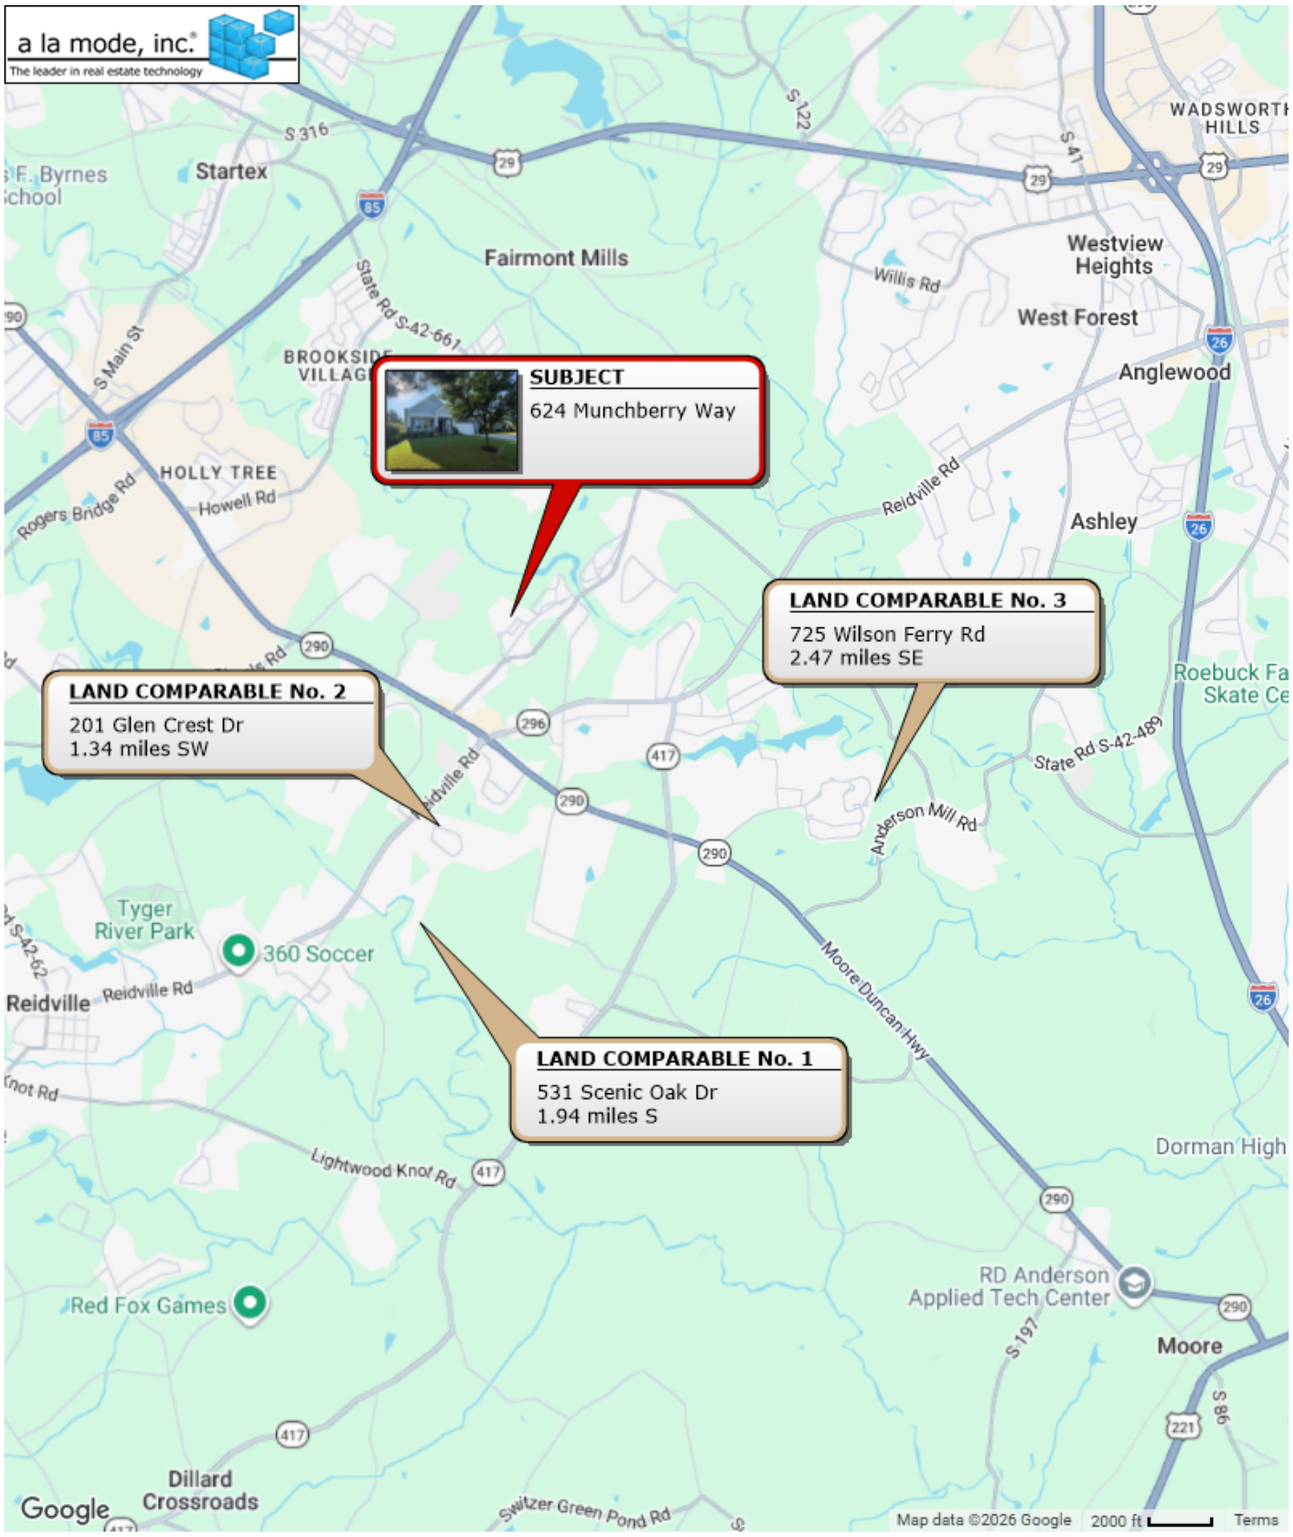

After development of a replacement cost new figure, allowances were made for all forms of depreciation. The depreciation estimate is for accrued depreciation, which refers to all forms of depreciation, which have actually occur as of the effective date of this report. Accrued depreciation is further broken down into various categories. These consist of physical curable deterioration, physical and incurable depreciation, functional obsolescence and external or economic obsolescence. Curable physical deterioration refers to items of deferred maintenance. The estimate of curable physical deterioration applies only to items in need of repair as of the effective date of report. Incurable physical deterioration pertains to structural items, which are not feasible to correct. The physical incurable deterioration has been measured by the "Age/Life Method" which is the ratio of the effective age to the economic life new of the improvement. The "Age/Life Method" is used when deterioration is assumed to occur at a constant average annual rate. Information necessary to calculate this type of depreciation includes the estimated replacement cost of the structure and the estimated effective age and useful life of the structure, as well as, the amount of curable physical deterioration already charged to the structure. Incurable physical deterioration can be classified as either short lived or long lived. A short lived item is expected to have an economic life shorter than primary structure and a long lived item is expected to have an economic life same as that of the primary structure. Items typically addressed within the incurable physical deterioration include appliances, roofing, carpeting and portions of the mechanical systems.

Functional obsolescence is a loss in value resulting from defects in design and can also be caused by changes that have been made over time in the structure. External obsolescence is the diminished utility of a structure due to negative influences which occur from outside the building or subject property. Based on my inspection of the subject property structure and the subject neighborhood in its current economic condition, along with the supply of competing properties, it is my opinion that the subject does not suffer from a functional or external obsolescence.

Reconciliation of Market Value

The quality and quantity of data available was reconciled and analyzed within the approaches considered. The Sales Comparison Approach is given the most consideration as it best indicates the interaction of buyers and sellers in this market.

The reconciliation of sales was based on weighted analysis with sales requiring the least adjustments being most like the subject. The Sales Comparison Approach was found to be less than the Cost Approach. This is not uncommon as external forces can cause these to move at different rates and in different directions. This is not found to affect the marketability of the subject. The Income Approach was not developed as it was determined in the scope of work that it was not relevant to this type of property or this market area and was not a reliable indicator of value due to insufficient verifiable rental data in this market area.

The reliability of the Cost Approach is greatly weakened when large amounts of depreciation must be estimated due to the age of the condition of the subject property. This approach is related to the principle of substitution; the value of the replaceable property tends to be indicated by the value if an equally substitute property. The Cost Approach is based on the principle that no one would pay more for an existing property than it would cost to replace or substitute the property with one of similar utility.

The Sales Comparison Approach is based on the proposition that an informed purchaser would pay no more for a property than the cost of acquiring an existing property with the same utility. It is a process of analysis about similar properties that have recently sold. It is essential that the comparable sales be investigated to insure that the sales were arms length and to discover the value contribution of any dissimilarities between the comparable and subject property. After all necessary adjustments have been made to the comparables; a value range for the subject property is indicated. The main strength of this approach, assuming there is an active market, is that it compares how buyers and sellers are behaving in the marketplace. The main weakness of this approach would include an inactive market and the use of unverified sales information.

The two approaches to value are correlated to arrive at an indication of market value for the subject property. The Sales Comparison Approach was determined to produce the most reliable value estimate for the subject property.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UAD Version 9/2011 (Updated 1/2014)

Supplemental Information *(continued)*

UAD Addendum

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:
3.2 indicates three full baths and two half baths.

UAD Version 9/2011 (Updated 1/2014)

Form UADDEFINE1A - "TOTAL" appraisal software by a la mode, inc. - 1-800-ALAMODE

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the definition of market value or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to Intended Use, Intended User, and the certifications are also not permitted. However, additional Intended Use, Intended User, and certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

Scope of Work

The scope of work for this assignment is based on the applicable assignment elements, including: the client and any other intended users, the intended use, the definition of market value that follows, the effective date, the subject property and its relevant characteristics, and the applicable assignment conditions. The appraiser must, at a minimum: (1) obtain and review adequate and reliable information for the subject property; (2) research, verify, and analyze adequate and reliable data for the subject market area including data for each comparable property reported; and (3) report his or her analyses, opinions, and conclusions in this appraisal report.

Intended Use

The intended use of the opinions and conclusions contained in this appraisal report is for the intended user to evaluate the property that is the subject of this appraisal for a mortgage finance transaction or related activities.

Intended User

The intended user of this report is the lender/client.

Definition of Market Value

The most probable price that a property should bring in a competitive and open market under all conditions requisite to a fair sale with the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for costs that are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable because the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third-party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar-for-dollar cost of the financing or concession, but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

Statement of Assumptions and Limiting Conditions

The appraiser assumes that the title is good and marketable unless he or she becomes aware of information to the contrary.

If the appraiser has included a sketch or floor plan in this appraisal report, it shows the approximate dimensions and is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

The appraiser has relied on data provided by third parties in this appraisal report. Such data may include, but is not limited to, floor plans, flood maps, multiple listing real estate services, tax assessment records, public land records, satellite imagery, virtual street views, property data services, surveys, engineering reports, and property data aggregations. After examination of the data and data sources, the appraiser has used only the data he or she considers reliable. The appraiser assumes there are no material omissions in the data relied upon and makes no guarantees, express or implied, regarding their accuracy. If the source date is prior to the effective date of the appraisal, the appraiser assumes the property characteristics and supporting information have not changed in the interim.

The appraiser will not be required to give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) that the appraiser became aware of during the development of this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and assumes that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

Certifications

Appraiser Certifications

The Appraiser certifies and agrees that:

1. I have no present or prospective interest in the property that is the subject of this report, or relationship with the present or prospective owners or occupants of the subject property, or other parties involved in this transaction.

2. I performed this assignment without bias with respect to the parties involved in this transaction, the property that is the subject of this report, or the demographics of the area where the property is located.

3. I am aware of and have complied with all applicable laws and regulations including antidiscrimination laws, rules, and requirements that apply to the appraiser and to the assignment.

4. I did not base any part of my appraisal on the actual or perceived race, color, religion, sex (including sexual orientation or gender identity), age (other than as applicable for legally age-restricted communities), marital status, disability, familial status, or national origin of the present or prospective owners or occupants of either the subject property or properties in the area of the subject property or on any other basis prohibited by the Fair Housing Act or the Equal Credit Opportunity Act, or any other basis prohibited by law.

5. I stated in this appraisal report my own personal, unbiased, and professional analyses, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

6. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

7. I meet the credential requirements for this assignment as of the date of this appraisal report and have knowledge and experience in appraising this type of property in this market area.

8. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records, and other such data sources for the area in which the property is located.

9. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

10. I personally performed an onsite inspection of the interior and exterior areas of the subject property. I reported the readily observable condition of the improvements in factual, specific terms. I identified and reported any known physical deficiencies that could affect the soundness or structural integrity of the property.

11. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was transmitted.

12. Using information available in the normal course of business, I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal.

13. Using information available in the normal course of business, I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale.

14. I based my valuation on the available properties that are most similar to the subject property.

15. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

16. I have identified the differences between the subject and comparable properties, analyzed the market reaction to those differences, and reflected those differences in the analysis.

17. To the extent possible, I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

18. I have taken into consideration the factors that have an impact on value with respect to the subject property, and its location, including its proximity to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that I became aware of during the development of this appraisal. I have considered these adverse conditions in my analysis of the property value and have reported on the effect of the conditions on the value and marketability of the subject property.

19. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

20. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analyses supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

21. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. No one provided significant real property appraisal assistance.

22. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

23. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

24. I am aware that any disclosure or distribution of this appraisal report or any of its contents by me or by the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

Certifications *(continued)*

25. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions. Any of the foregoing persons or entities who receive this appraisal report may choose to store, copy, reproduce, analyze, use and distribute the data in the appraisal report for internal or external purposes without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media). A person or entity who receives a copy of an appraisal report does not become an intended user, unless the appraiser identifies such person as an intended user. The appraiser and supervisory appraiser (if applicable) shall have no liability for any use of this appraisal report not related to the mortgage finance transaction and related activities for which this appraisal report was prepared.

26. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may choose to rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties. A person or entity who receives a copy of an appraisal report does not become an intended user, unless the appraiser identifies such person as an intended user. The appraiser and supervisory appraiser (if applicable) shall have no liability for any use of this appraisal report not related to the mortgage finance transaction and related activities for which this appraisal report was prepared.

27. If this report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this report containing a copy or representation of my signature, I agree that my electronic signature has the same force and effect as my manual handwritten signature, and that the report is enforceable and valid as a paper version of this report would be if delivered containing my manual handwritten signature.

28. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

29. I have not performed any service regarding the subject property within the three years preceding the agreement to perform this assignment.
